

A simplified transcoding solution for AWS Elemental MediaConvert.

What is Convert+?

Convert+ by Float Left leverages the power of AWS Elemental MediaConvert, a file-based video processing service that provides scalable video processing, and makes it easy enough for anyone to use, regardless of technical knowledge.

Convert an input file into multiple output files for high-quality video on a range of platforms and devices.

The form includes the following fields and controls:

- Job Name: Text input field.
- Files: Text input field with a plus icon.
- Output: Dropdown menu.
- Settings: Text input field with a gear icon and a dropdown arrow.
- Output Destination: Text input field with a plus icon.
- At the bottom is a large purple button labeled "CONVERT".

Creating Jobs

1. Select one or multiple files from an s3 bucket.
2. Select an output group:
 - File Group, Apple HLS, DASH ISO, Microsoft Smooth Streaming, CMAF
3. Choose video format/settings presets.
4. Select an output bucket.
5. Add job to the queue.
